

How we provide Safe & Socially Distanced First Aid Training during COVID-19

On Arrival...

- *All learners checked for COVID-19 symptoms*
- *All learners screened using non-contact infra-red thermometer to check their temperature*
- *All learners to sanitise their hands using equipment provided*
- *Learners to be issued with gloves, face shields and handouts*

During Course...

- *Learners to be spaced x2 metres apart during ALL theory and practical elements of the course.*
- *Learners will watch a short video about how COVID-19 spreads*
- *Instructor will explain how the group will be organised to maintain 2 metre distance throughout all elements of the course*
- *Instructor will explain and monitor the sanitising of CPR manikins using special anti-viral (Trionic)/anti-bacterial wipes.*
- *Our CPR manikins are maintained to the highest standard using disposable airways, anti-viral & anti-bacterial disinfectant wipes and a rigorous cleaning regime*
- *As a **double failsafe**, we will be using CPR face shields*
- *Learners to wash and sanitise their hands after each session/break*

****These measures have been approved as sufficient by Health & Safety Executive and Consultant Microbiologists at NHS England****
